Delhi · BCA, IGNOU · NIELIT A-Level

SUMMARY

Aspiring backend developer focused on Python, Django, MySQL, and PostgreSQL. Builds reliable applications with clean architecture, efficient algorithms, and practical AI learning across real-world projects.

SKILLS

Languages: C, C++, Python, JavaScript, SQL

Backend: Django, REST APIs, Auth, Flask

Databases: MySQL, PostgreSQL, SQLite, query optimization

AI / ML: preprocessing, evaluation, EDA, AI apps

SELECTED PROJECTS

- **LPG Booking System** — Django/MySQL booking workflows, OTP login, delivery rules, status tracking.
- **SecureScan Platform** — Defensive SAST/SCA/secrets scanning with Django API and findings reports.
- **PDF AI Assistant —** Natural-language Q&A over uploaded PDF documents.
- **DSA Mentor Studio** — Tkinter/SQLite desktop mentor for structured DSA practice.
- **Trading Dashboard —** Flask, PostgreSQL, Binance data, watchlists, and analytics.
- **Finance Dashboard System —** Django/MySQL income, expense, and insight tracking.

EDUCATION

Bachelor of Computer Applications (BCA) — IGNOU
NIELIT A-Level

FOCUS

Backend systems + AI learning. Goal: practical AI and reliable software.
